

Salt Lake City

4-16-1891.

Dear Sir; -

I sent to you some weeks ago to find out the price of the Supplement that Dr. Gray issued to his Synoptical Flora and to find whether he issued a second edition of that part of it after the Compositae. I have heard nothing from you. Will you kindly reply and give the desired information as I want to purchase.

I also want the Genera Plantarum of Bentham and Hooker if you are still the one who has it to dispose of.

I made a rather extensive collection last year and will send you some plants to name if I hear from you. There are a few that I cannot identify though I have nearly all the literature on the subject. There are a number of new species beside. I have one or two genera that I think are new. If I need help on them I may send them also.

I enclose postage.

Respectfully,

*Marcus S. Jones*
